

Wahyu Rohman Dwiputra

085-649-348-597 | wahyurohman249@gmail.com | Surabaya, East Java

[Portofolio](#) | [Linkedin](#) | [Github](#)

A sixth-semester student in the D4 Applied Data Science Study Program at the Electronic Engineering Polytechnic Institute of Surabaya. Experienced in data analysis and processing. Skilled in analyzing data, creating analytical dashboards, and building machine learning models to solve regression, classification, and clustering problems. Familiar with data processing tools and machine learning algorithms.

INTERNSHIP

Tech Development Intern

February 2026 - Sekarang

Trustmedis

- Assisted the team in creating database schemas.
- Created ODS master table migrations.
- Set up file definition query.

EDUCATION

D4 Applied Data Science

August 2023 – Now

Electronic Engineering Polytechnic Institute of Surabaya – Surabaya, East Java

- GPA 3.69 / 4.00
- Received funding from “Program Mahasiswa Wirausaha 2024”
- Participant in the “Program Mahasiswa Wirausaha 2024”

SKILL

Hard Skills	Python Programming Build Machine Learning and Deep Learning Model Create Dashboard Analytics SQL DML Query Data Annotation VLOOKUP HLOOKUP
Soft Skills	Communication Work ethics Emotional intelligence Teamwork Positive attitude Critical thinking Adaptability
Software	Microsoft Power BI Tableau Grafana Metabase Google Looker Studio Microsoft Office Microsoft Excel
Bahasa Indonesia	Fluent
Bahasa Inggris	Moderate

CERTIFICATION

TOEFL Test (Skor 473) Brighten English	2025
Advanced POWER BI for data exploration and visualization Electronic Engineering Polytechnic Institute of Surabaya	2024
Advanced GRAFANA for data exploration and visualization Electronic Engineering Polytechnic Institute of Surabaya	2024
Advanced TABLEAU for data exploration and visualization Electronic Engineering Polytechnic Institute of Surabaya	2024

PROJECT

Project-Based Learning: “Application of the PRINCALS Dimension Reduction Method and Robust Clustering for Provincial Economic Segmentation in Indonesia” Applied Data Science, Electronic Engineering Polytechnic Institute of Surabaya - Reducing the dimensionality of mixed-scale data in Indonesia’s economic data and performing economic segmentation of Indonesia’s provinces using a clustering method that is robust to outliers. - Visualizing the clustering results in a dashboard.	November 2025
Project-Based Learning: “Analysis of Macroeconomic Factors Affecting High Levels of Foreign Direct Investment (FDI) in Indonesia Using Probit Regression” Applied Data Science, Electronic Engineering Polytechnic Institute of Surabaya Developed a probit regression model to determine the probability of high foreign direct investment in Indonesia based on economic factors such as exports of goods and services, GDP growth, inflation, the official exchange rate, interest rates, and remittances.	October 2025
Final Project: “Heart Disease Prediction” Bootcamp Machine Learning dan AI Batch 17 DQLab - Building a machine learning model to predict the likelihood of an individual being at risk for heart disease. - Applying hyperparameter tuning to find the optimal parameters and improve the accuracy of the machine learning model.	July 2025
Project Based Learning: “Market Basket Analysis Using The Apriori Algorithm” Applied Data Science, Electronic Engineering Polytechnic Institute of Surabaya Building a clustering model for market basket analysis using the Apriori algorithm. Market basket analysis plays a role in determining product layout, identifying product purchase patterns, and determining product bundles.	November 2024
Project Based Learning: “Text Summarization of Netflix App Reviews Using the Bidirectional and Auto-Regressive Transformers (BART) and Text-to-Text Transfer Transformer (T5) Methods” Applied Data Science, Electronic Engineering Polytechnic Institute of Surabaya Building a model to summarize Netflix app reviews on the Google Play Store using the BART and T5 transformer methods.	October 2024
Project Based Learning: “Classification of Well Water Quality in DKI Jakarta Province Using Discriminant Analysis” Applied Data Science, Electronic Engineering Polytechnic Institute of Surabaya - Developed a classification model to classify well water quality in DKI Jakarta Province into 4 categories: good, slightly contaminated, moderately contaminated, and heavily contaminated. - Compared two discriminant analysis methods: linear discriminant analysis and quadratic discriminant analysis.	April 2024

ORGANIZATION

Head of Foreign Division Forum Komunikasi Mahasiswa Bidikmisi dan KIP-K Surabaya Madura - Served as a liaison between FKMB SURAMADU and forums both within and outside FKMB SURAMADU. - Coordinated division members in executing work programs. - Developed the Foreign Division’s work program for a one-year term. - Successfully held “Sosialisasi Forum” attended by more than 80 participants.	November 2024 – November 2025
Volunteer of “HIMIT Social Action X Study With HIMIT” Himpunan Mahasiswa Teknik Informatika Politeknik Elektronika Negeri Surabaya - Serve as a facilitator during group discussion sessions. - Provide guidance on “How to Use Social Media Safely and Responsibly”. - Lead younger students in game sessions. - Assisting with preparations for the Iftar gathering.	March 2025

Head of Sponsorship Division for “Bina Desa Jilid X”

July 2024 – August 2024

Forum Komunikasi Mahasiswa Bidikmisi dan KIP-K Surabaya Madura

- Secured 3 sponsors for the implementation of Bina Desa Volume X.
- Contacted and negotiated with sponsors.
- Coordinated division members in identifying, contacting, and negotiating with sponsors.
- Coordinated division members in receiving and managing donations from donors.

Member of Sponsorship Division for “Bina Desa Jilid X”

May 2024 – July 2024

Forum Komunikasi Mahasiswa Bidikmisi dan KIP-K Surabaya Madura

- Compiling a list of sponsors and their contact information.
- Serving as a liaison between the organizing committee and donors during the donation drive.

TRAINING

Kerja ID Course

2025 - Now

Kerja ID

- Studying about microsoft excel, google sheet, power query, microsoft power bi, looker studio, and tableau.

Mastery Deep Learning

2025

Fresh Graduate Academy Digital Talent Scholarship 2025 KOMDIGI

- Studying artificial neural networks for image recognition and transfer learning.

Intermediate Deep Learning

2025

Fresh Graduate Academy Digital Talent Scholarship 2025 KOMDIGI

- Studying deep neural networks, including optimization and regularization.

Fundamental Deep Learning

2025

Fresh Graduate Academy Digital Talent Scholarship 2025 KOMDIGI

- Learn the basics of deep learning, categories of machine learning, and the evaluation of classification models, linear regression, and logistic regression.

Basics Implementation of Artificial Intelligence

2025

Micro Skill Digital Talent Scholarship 2025 KOMDIGI

- This training taught me the basics of artificial intelligence implementation, the artificial intelligence development lifecycle, personal data protection, and ethics in the use of artificial intelligence.

AI Engineer for Milenial

Micro Skill Digital Talent Scholarship 2025 KOMDIGI

- This training teaches participants how to communicate effectively with Artificial Intelligence (AI) using the right prompts so that the AI provides solutions that align with our needs.

Bootcamp Data Analyst with SQL & Python in Google Platform Batch 18

2025

DQLab

- Learn data analysis processes using SQL, Google BigQuery, and Python.
- Learn how to create analytics dashboards using Google Looker Studio.

Bootcamp Machine Learning & AI for Beginner Batch 17

2025

DQLab

- Learn machine learning workflows and methods for solving classification, regression, and clustering problems.
- Learn how to find the optimal parameters in machine learning through hyperparameter tuning.
- Learn how to deploy models using Streamlit.
